Annual Report

for the fiscal year ended March 31, 1983

Nova Scotia

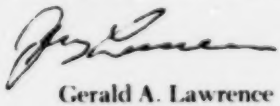
Department of Government Services

The Honourable
Alan R. Abraham, C.D.
Lieutenant Governor
Province of Nova Scotia

May It Please Your Honour:

I respectfully submit, herewith, the annual report of the Department of Government Services for the fiscal year ended March 31, 1983.

I have the honor to be, Sir,
Your Obedient Servant,



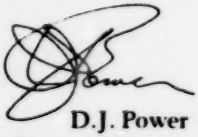
Gerald A. Lawrence
Minister

The Honourable
Gerald A. Lawrence
Minister, Department of
Government Services
Province of Nova Scotia

Sir:

I hereby submit the annual report for the Department of Government Services for the fiscal year ended March 31, 1983.

Respectfully Submitted,



D.J. Power
Deputy Minister

INTRODUCTION

The Department of Government Services provides services to all departments, agencies, boards, commissions, Crown corporations and the Legislature. In addition, the Department deals with the private sector in matters of contracting, leasing and property maintenance.

The services the Department provides include:

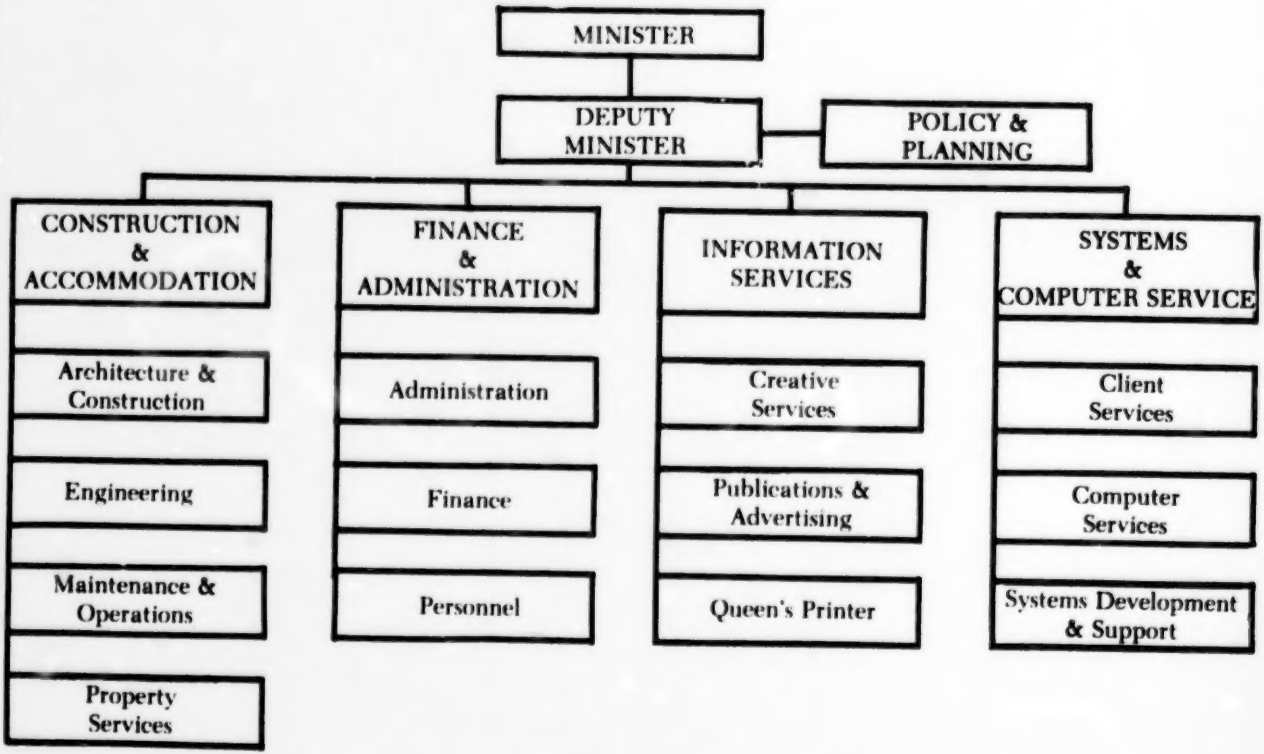
- Operating as the government's "landlord", providing requirements for accommodation, property maintenance and security and related support services;
- Developing and maintaining government data processing systems and related computer services;
- Developing creative information programs for public and internal use by other departments;
- Operating the Provincial Government Bookstore and Public Enquiry Service;
- Maintaining a stationery stockroom for all departments of government;
- Gathering and distributing government mail, interdepartmental messages, parcels and other goods;
- Supervising and coordinating government telecommunication services;
- Disposing of surplus Crown property;
- Acquiring furnishings, equipment and other supplies required by departments;
- Retaining and managing government records and disposing of redundant material as necessary;
- Administering government-wide insurance programs.

The Department is structured into five divisions:

— Policy and Planning;
— Construction and Accommodation;
— Finance and Administration;
— Information Services;
— Systems and Computer Services.

Departmental activities during the year are delineated in greater detail in subsequent sections of this Annual Report.

ORGANIZATIONAL CHART



POLICY AND PLANNING DIVISION

This division assists the Minister and Deputy Minister of the Department in establishing departmental policies and fulfilling long-range planning strategies.

CONSTRUCTION AND ACCOMMODATION DIVISION

The Construction and Accommodation Division is primarily involved with buildings, grounds and property — their design, construction, purchase, lease, renovation, alteration, maintenance and management.

Disposal of surplus Crown property, procurement of telecommunications requirements and office layout and design are also among the division's responsibilities. Depending upon circumstances, the division either undertakes design projects with its own staff or engages architectural and engineering consultants from the private sector, while still maintaining project supervision. Actual construction work is normally carried out under contract to the private sector.

During the fiscal year ended March 31, 1983, the Construction and Accommodation Division was engaged at various stages in several new and major renovation projects.

Among major new projects completed during the fiscal year were: renovations to the electrical distribution system of the Miller Hospital in Kentville; construction of Core Storage buildings for the Department of Mines and Energy at Stellarton Industrial Park; a fire protection system at the Nurses' Residence of the Nova Scotia Hospital in Dartmouth; mechanical additions at the Fisheries Museum of the Atlantic (Phase IV) in Lunenburg.

New projects undertaken or continued from the previous year include: practical and aesthetic improvements to Harbour View Hospital in Sydney Mines; construction of the Cox Institute of Technology at the N.S. Agricultural College in Truro; practical and aesthetic improvements to the Ambulatory Care and Oncology Centre at Victoria General Hospital in Halifax; improvements to the Library of the N.S. Agricultural College, Truro; installation of an emergency power system at the Heating Plant building of the N.S. Agricultural College, Truro; installation of a fire protection system in the Administration Building of the Nova Scotia Hospital in Dartmouth; major alterations to the Abbie J. Lane Hospital in Halifax; alterations to the Colchester Historical Museum (Phase I) in Truro; supply of emergency power generation equipment at Victoria General Hospital

in Halifax; electrical additions to the Fisheries Museum of the Atlantic (Phase IV) in Lunenburg; practical and aesthetic improvements to the Aberdeen Hospital in New Glasgow; outdoor improvements at the Ambulatory Care and Oncology Centre at Victoria General Hospital in Halifax.

FINANCE AND ADMINISTRATION DIVISION

In addition to providing everyday internal support to the Department, the Finance and Administration Division continues to administer particular common services for other departments and agencies of government. These services include public liability and related insurance coverage.

This Division works in concert with the other divisions of the Department in an effort to ensure a coordinated administrative approach to consistent budget control of expenditures.

INFORMATION SERVICES DIVISION

The Information Services Division comprises Publishing and Advertising, Creative Services and Queen's Printer.

This division provides all government departments and agencies primary and ancillary services including advertising, graphic art, photography and film, public enquiries, printing services, writing, editing and distribution of news releases and feature articles, media monitoring, audio services, slide show production, exhibits and displays and a Government Bookstore operation.

Approximately 2,000 news releases were distributed during the year by Telex, TWX and mail. Media Services, in conjunction with Audio Services, provided winter road reports, and reports on forest fire hazards, produce and livestock markets, ski resort and beach conditions.

In the Public Enquiries unit, close to 10,000 enquiries, both written and "walk-in", were answered. Public Enquiries also provided updates on Nova Scotia for several national and international reference publications.

The Media Monitoring Service provided coverage and relevant clippings on national and international publications to 24 government departments.

The Queen's Printer produced a combined total of 33,776,917 impressions during the year.

Photographic staff completed assignments for media, promotional projects and security I.D.s, completing close to 500 photo assignments over the year.

The film unit completed five major information and training films, television commercials, special television and film projects, as well as providing stock footage to national and international television networks.

Art and Design handled 831 assignments. Audio Services distributed 136 "billboards" to electronic media containing 247 voice "actualities". In addition, the unit was responsible for the production of soundtracks for slide shows, provision of dubs of new cuts and media conference feeds.

Six original slide shows were written and produced during the year, plus specialized writing for advertisements and features. Seventy-two (72) exhibits and displays were handled for exhibitions, departmental and window display usage.

SYSTEMS AND COMPUTER SERVICES DIVISION

The Systems and Computer Services Division provides computer system development and support services to government through its Client Services and Systems Development and Support sections. The Division's Computer Services Section operates the provincial government's shared-use computer and micrographics centres.

The division is also responsible for the specification and acquisition of computer-related software and hardware, including microcomputers and word processors.

The division undertook 155 development and consulting projects during the year, the majority of which were completed.

Private sector consulting firms supplemented systems development activities and 20 development contracts in ten departments were awarded.

Computer services and equipment were acquired on nine occasions through public tendering. These included a Regional Hospital Blood Bank System for the Department of Health, text processing systems for the Nova Scotia Housing Commission, Victoria General Hospital, Halifax,

instructional computer equipment at the Nova Scotia Institute of Technology, Halifax, and Pictou Regional Vocational School, Pictou.

Twenty-one invitational tenders for computer terminals, microcomputers and word processors were issued on behalf of 11 government departments.

Major alterations were made to the Provincial Data Centre to improve physical security and work flow. For computer security, planning for the acquisition and installation of access control software was begun.

An additional IBM 4341 computer, along with associated ancillary devices was installed in the Provincial Data Centre for the computing requirements of the Department of Social Services. It is operated by SCS personnel and integrated for backup by an additional two IBM computers.
